TECHNOLOGY ADVANCEMENT AT AAT – FIRST CTO IN HONG KONG TO INTRODUCE AN AUTOMATIC CARGO DIMENSIONING SYSTEM 亞洲空運中心率先推出自動測量貨物體積系統服務

AAT is pleased to announce that it is the first Cargo Terminal Operator in Hong Kong to introduce an Automatic Cargo Dimensioning System (ADS), an innovative technology solution to facilitate customers, from January 2016.

We understand the importance of the accuracy of a shipment's weight and dimensions for freightage calculation and aircraft safety. To strengthen our service and protect the ultimate interest of our valuable customers, we introduced the ADS system to further improve data accuracy as well as the overall efficiency of the cargo acceptance process.

Improved Data Accuracy and Aircraft Safety

The ADS allows the exact dimension, weight and image of cargo at piece level to be captured and transmitted to Cargo Management System (CMS). Through utilizing the system, data accuracy for the overall measurement processes is ensured with human errors eliminated. In addition, through the photo capturing feature in the ADS, the image of the shipment will be automatically saved so that the cargo condition during acceptance process will be recorded and can be provided when required.

Centralized Operation and Streamlined Cargo Acceptance Process

The cargo acceptance process is streamlined to achieve higher operational efficiency and time-saving benefits. At present, X-Ray screening, weighting and RCL issuance are performed at two different locations and the cargoes are required to travel between the locations by forklift. ADS enables an integration among X-Ray screening, cargo measurement and weight capturing thus allowing the cargo acceptance process to be performed at one single location. In terms of efficiency, ADS is able to process 2000 shipments per hour versus around 1000 shipments by standard X-Ray screening. Overall, the new system speeds up the cargo acceptance and X-Ray screening process by approximately 3.5 minutes per RCL issuance.

Mr. Khaw Hock Eng, General Manager of AAT said, "We are very pleased to have another innovative product brought to our customers. The ADS, along with our highly reliable cargo operation team will continue to service our customers with increased accuracy and efficiency."

As always, AAT strives and will continue to look for enhancement in every aspect to exceed our customers' expectations.

ADS is conveniently located at 2/F of AAT.
自動測量貨物體積系統位於亞洲空運中心貨站二樓。

ADS can measure the exact dimension and weight cargo at piece level.
系統能準確偵測及儲存貨物的尺寸及重量。

亞洲空運中心於二零一六年一月率先推出自動測量貨物體積系統，為香港首間空運貨站引入此項創新技術解決方案。

我們深明貨物重量及尺寸數據的準確性對飛機安全有莫大影響。為提高服務質素和保障各尊貴客戶的利益，亞洲空運中心推出全新服務－自動測量貨物體積系統，以進一步提升數據的精準度及整體營運效率。

加強數據準確性及飛機安全

自動測量貨物體積系統能偵測及儲存貨物的尺寸、重量和影像，並傳送到貨物管理系統(CMS)。該自動化的測量系統能有效地減少人為錯誤，以確保數據的準確度。同時，透過系統內的攝像功能，貨物的影像將自動儲存在系統內，有需要時可為客戶提供貨站收取貨物時的貨物狀況。

集中處理及簡化貨物接收程序

透過自動測量貨物體積系統，整體的貨物接收程序得以簡化，既提高效率亦節省時間。現時的X光貨物檢測儀器、秤重器和發放收貨核對清單櫃檯分別於不同位置進行，員工需要利用鏟車搬運貨物到各位置以作檢查。而新系統則結合X光檢測、貨物量度和秤重的功能，貨物只需停留在同一個位置便可完成檢測程序。相比現有的X光貨物檢測儀器每小時只可處理約1000件貨物，新系統每小時可處理達2000件貨物。總體來說，該系統優化了收貨和X光檢測的流程，每處理一張收貨核對清單可以減省3.5分鐘，為客戶帶來更高效的收貨程序。

亞洲空運中心總經理許福榮先生表示：「我們非常高興能為客戶帶來另一項創新服務。該自動測量貨物體積系統與我們可靠的貨物運作團隊，定能為我們的客戶帶來高效及精準的服務。」

一如以往，亞洲空運中心推陳出新、不斷求變，銳意超越客戶的期望。

焦點報導 Spotlight

Vietnam Airlines Actively Improves Quality of Services 越南國家航空 積極提高服務質素

Mr. Nguyen Quoc Tuan, General Manager of Hong Kong, Vietnam Airlines (VN), shares the latest development of VN and the substantial partnership with AAT over the past 10 years.

Vietnam Airlines positions its internationally recognized brand as a young and modern as well as a 4 star service standard carrier. Founded in 1956 as Vietnam Civil Aviation, the fleet started to serve domestic flights in September 1956. The airline was established as a state-owned enterprise in April 1989. Until now, the Airline flies to 52 destinations in 17 countries excluding the code-sharing services.

Q: How is VN's development plan with the new B787 and A350 delivery?

A: Until this moment, we have ordered ten B787-9/10 and six A350-900, sixteen new and modern aircraft in total which will be delivered to us by December 2016. These two types of aircrafts serve different routes; B787-9 operates to London and domestic routes, while A350-900 operates to Paris, Frankfurt, South Korea, Japan and domestic routes. We are always ready to upgrade for more destinations upon the demand in the market.

Q: How does VN cope with the trend of e-Commerce development?

A: VN is ready for the e-Commerce wave! We aim to research, develop and enhanced services for e-Commerce shipments and establish relationship with supply chain operators. The key initiative for e-Commerce business success is quick response time. VN is moving closer to achieve the market requirement through developing online sales and the applications of mobile devices such as smartphones and tablets.

Q: Being with AAT for almost 10 years, what does VN think about the long-term partnership?

A: We appreciate the commitment that AAT has demonstrated to facilitate our cargo handling operations in Hong Kong for almost 10 years. Apart from the standards and quality assurance, AAT also shares the same idea on "safety and security". We believe that such a long and reliable partnership with AAT will create added value to VN and our business partners.

Q: Can you share with us some personal unforgettable experience in VN or in the cargo industry over the years?

A: My unforgettable experience dates back to 1994, which was one remarkable year of VN to expand our network in the world. At that time, we had to develop VN with the very old model of Russian Aircraft like Tupolev 18 with other western modern aircraft such as Airbus 320, 300, 310, Boeing 767 etc., and set up our modern technical base in Vietnam to carry out maintenance work for our fleets. For 20 years of development at an average annual growth rate consistently in double-digit, we have advanced to become a major player in the Asian aviation market.

亞洲空運中心很榮幸能邀請到越南國家航空的總經理Mr. Tuan與我們分享越南國家航空的最新發展動向及與我們過往十年的合作夥伴關係。

Mr Nguyen Quoc Tuan, General Manager of Hong Kong of Vietnam Airlines, shares the latest development of VN. 越南國家航空總經理 Nguyen Quoc Tuan 先生分享越航的最新發展。

越南國家航空定位其國際形象為一家年輕及現代化，並且擁有四星級服務標準的航空公司。成立於一九五六年，當年名為「越南民航」，於一九五六年九月開始國內航線的服務。直到現時為止，其航線擴展至世界十七個國家，涵蓋五十二個目的地，當中不包括聯營航班的服務。

問：越南國家航空未來有甚麼發展計劃呢？

答：我們總共購入了十六架全新現代化飛機，包括十架 B787-9/10 和六架 A350-900，將於二零一六年十二月送抵。這兩款機種分別服務不同的航線，B787-9 主要服務於倫敦和越南國內航線；而 A350-900 則飛行巴黎、法蘭克福、南韓、日本和越南國內航線。我們已準備好因應市場需求而增設更多的服務航點。

問：越南國家航空會如何應對電子商務的發展趨勢？

答：我們已準備好迎接電子商務的浪潮了！我們的目標是研究和開發更多電子商務的增值服務，並積極建立與供應鏈營運商的關係。我們認為要成功迎合電子商務的熱潮，關鍵是在於快速且及時的行動。而我們正發展網上銷售和流動設備的應用，以配合市場所需，為顧客提供更便捷的服務平台。

問：與 AAT 合作近十年，越南國家航空對於此長期的夥伴關係有甚麼感想呢？

答：我們十分欣賞與 AAT 的合作關係。過往十年，AAT 為我們在香港提供貨物處理服務，其服務標準及品質保證值得我們信賴。此外，我們更秉承著一樣的理念－「安全與保安」。我們相信此長期並可信的夥伴關係能為越南國家航空帶來更高效的服務。

問：您可以與我們分享在越南國家航空或貨運行業的一些難忘經歷嗎？

答：這可以追溯至一九九四年。那時候，我們只有最舊款式的俄羅斯飛機 Tupolev 18，以及其他西方現代化飛機如空中巴士 A320、A300、A310 及波音 767 等，但我們決定設立首個現代技術基礎的飛機維修站，為自己的飛機進行維修及保養。在二十多年的發展中，越南國家航空的年均增長持續地有雙位數字的增長，在亞洲航空市場佔據著重要的位置。
